

## EZ GasCal™ - Model Number Matrix

### Series = EZ GasCal™ - Gas calibration station

#### **EZGC** = EZ GasCal™ gas calibration station

EZ GasCal™ is the ideal calibration station for the Vigilante AQS™ and Zephyr AQS™ series of gas sensors. The station allows the calibration of the underground gas sensors in a clean and controlled surface environment.

The gas calibration station provides either a single or dual plug-in receptacle to allow the calibration of digital smart sensors.

The calibration station comes complete with 1 metre power cord. The power supply required is 100-240 VAC, 47 to 63 Hz.

The EZ GasCal™ comes complete with an aluminum back panel for wall mounting.

CE Compliant

#### 1 = Options

**1** = Single gas receptacle.

**2** = Dual gas receptacles.

**ESA** = ESA (Electrical Safety Authority) approval for general purpose applications.

**CSA** = CSA special approval for general purpose applications.

**NOTE 1:** The EZGasCal™ is illustrated with two gas sensors that are not included but will have the digital receptacle(s).
